

Project charter

Introduction

The Acme site redesign starts in March and replaces the marketing pages with a faster, accessible build.

Tumnis keeps the plan, the brief and the files of a project in one place, so every agent works from the same facts. This paragraph is filler text written for the extraction fixtures; it carries no meaning beyond giving the page a body of prose.

Scope

The scope covers the home page, the pricing page and the blog; the shop stays out of scope until the second phase.

Tumnis keeps the plan, the brief and the files of a project in one place, so every agent works from the same facts. This paragraph is filler text written for the extraction fixtures; it carries no meaning beyond giving the page a body of prose.
